

## Master's Degree Adult and Community Education Sustainability (ACES)

Helping organizations create practical solutions in a leadership environmental culture can impact the community and the people it serves. Adult and community educators serve the communities from which targeted individuals originate by encouraging the building of communities of practice that focus on sustainable local, state, national and international communities. Leaders within these communities need to build certain skills in order to create and maintain sustainable organizations. A key value of sustainability leaders is considering the needs and aspirations of future generations.

### Sustainability Leaders Need:

- A global mindset
- Be rooted in community
- A thirst for global awareness
- A sense of urgency
- A capacity for innovation
- A respect for diversity
- To value integrated thinking
- Be an agent of change

### ADVANCE YOUR CAREER WITHOUT GOING TO CAMPUS!

- Become a highly effective change agent
- Learn to create connections between the fields of adult education, sustainability and environmental education
- Learn to impact your community and the people it serves with practical solutions

### Program Features:

- ▶ Learning, Training and Practical Experience
- ▶ High-quality faculty with research and business backgrounds, as well as adult and community education-based experience

- ▶ Courses with flexible, self-directed, convenient schedules; accessible at all times  
Your road map to becoming a leader in sustainability begins at Florida Atlantic University, where College of Education faculty delivers outstanding instruction at the graduate level with courses that meet national quality benchmarks.

The Online Master's Degree in Sustainability is a 36-39 credit program intended to provide learning, training and practical experience, in both formal and non-formal settings, that fosters personal development, community development, and action for change in our human and natural worlds. This program intends to prepare students to respond to uncertain and rapidly transforming world conditions in ways that value personal initiative, responsibility, creativity, commitment and collaboration with others.

Students will learn to share strategies for developing learning communities that emphasize sustainability and environmental stewardship at all levels because each individual's quality of life is connected to the well-being of the community, both locally and globally.
